Profile Summary

I am a frontend-focused full-stack developer with 3 years of experience building performant, responsive, and user-centric web applications. I have a strong foundation in full product development lifecycles, with an emphasis on clean UI/UX, AI integration, and scalable system design. I am a fast learner with proven ability to lead end-to-end builds, collaborate cross-functionally, and ship production-ready solutions.

Work Experience

React Native Developer — Game Company

Remote | Oct 2025 – Present

Tools: React Native, TypeScript, WebSockets, Reanimated, Expo

- Developing interactive mobile gaming experiences using React Native with a focus on smooth gameplay and responsive UI interactions.
- Implemented real-time multiplayer and live game communication features using WebSockets for low-latency synchronization.
- Built advanced animations and transitions using Reanimated to improve user engagement and gameplay feel.
- Optimized application performance, reducing lag and improving rendering efficiency across Android and iOS devices.
- Integrated mobile-native features, touch gestures, audio interactions, and dynamic in-game feedback systems.
- Participated in debugging, testing, and performance profiling to ensure stable releases and smooth cross-device compatibility.

TalentNest (Remote) — Full-Stack Engineer

Remote | Apr 2024 – Present

Tools: Next.js, React, TypeScript, Tailwind CSS, Redux, Node.js, Express, MongoDB, Cohere API, Cloudinary, Puppeteer, Docker, Fly.io, Vercel

- Designed, built, and launched TalentNest, an AI-powered hiring platform with 3 custom dashboards: Talent, Company, and Admin.
- Implemented end-to-end application workflows including multi-step onboarding, role-based auth, resume parsing, job matching, scheduling, and offer letter generation.

- Integrated Cohere embeddings for smart ATS functionality that parses and ranks resumes against job descriptions.
- Built and deployed secure RESTful APIs and microservices architecture using Docker and Node.js.
- Automated cover letter/email generation and interview scheduling using Puppeteer and Nodemailer.
- Managed project design, architecture, and deployment single-handedly, demonstrating product ownership and cross-functional thinking.

Plabosce — Software Developer

Remote | Mar 2025 – May 2025

Tools: Next.js, TypeScript, Supabase, Stripe, Framer Motion, Recharts, Headless UI, Tailwind, Context

- I contributed to building Plabosce a modern, responsive web application.
- I implemented key user interfaces including the dashboard, settings page and reusable UI components.
- I integrated Stripe for secure one-time payments, including a coupon system, and developed a custom webhook to track user subscriptions.
- I created backend APIs to manage user data and track subscription status securely.

JobKitt — Software Developer

Remote | Nov 2024 – Feb 2025

Tools: Next.js (Full Stack), TypeScript, Tailwind CSS, Firebase, React DnD, Context (state management), quill.js

- I contributed to building an AI-powered resume and cover letter platform tailored for job seekers.
- I developed the core resume builder, including dedicated field form sections, custom templates and a rich template editor.
- I implemented a dedicated formatting toolbar for font size, line height, font style, and template switching.
- I built and maintained a global ResumeBuilderContext to manage resume data and interactions across the app.

Freelance – Software Developer (Self-Employed)

Remote | Aug 2023– Nov 2024

Tools: Next.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, Nodemailer, React Hook Form, redux, Typescript, Firebase, Leaflet Map, OpenStreetMap, Framer motion, Php, HTML, CSS, Heroku

- I developed a full-stack platform featuring secure user authentication and protected dashboards. I built a notification system and integrated third-party tools such as Calendly, Cloudinary, and Nodemailer for email communication.
- I developed secure RESTful APIs using Node.js and Express, with MongoDB for data storage and ensured strong security.
- I built **FastKar**, a full-stack ride-booking platform using Next.js, TypeScript, Firebase, Tailwind CSS, OpenStreetMap, and NextAuth. Included auth, trip flows, real-time updates, and responsive mobile-first design.
- I delivered FoodieRecipe, a full-stack PHP/MySQL web app for a client to manage food listings, with dynamic content rendering and backend dashboard.
- I owned development, UI/UX decisions, hosting, and delivery of both applications.

Hitec City Technologies — Frontend Developer

Lagos, Nigeria | Jan 2023 – Jun 2023

- Built responsive pages for the “Lenders NG” website, ensuring cross-device functionality and clean design.
- Participated in Agile workflows and reviewed team code for quality.

Education

University of Lagos (Jan 2016 – Sept 2023)

Bachelor of Engineering in Civil & Environmental Engineering

Women Techsters Fellowship – Tech4Dev (Aug 2022 – Mar 2023) Software Development (Frontend)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, PHP,

Frameworks & Libraries: React, React native, Next.js, Node.js, Express, Redux, Tailwind CSS, Framer Motion, React Native, Firebase, NextAuth, Supabase, Headless UI, Material UI, Shadcn Ui

Databases: MongoDB, MySQL

DevOps & Tools: Git, Docker, Fly.io, Vercel, Netlify, Render, Heroku, Postman, Figma

Others: Cohere (AI embeddings), Open Ai, Puppeteer, Cloudinary, OpenStreetMap, NextAuth, Firebase, Supabase

Collaboration Tools: Notion, Slack

Projects

TalentNest – [Live Site](#) | [Demo Video](#) | [Admin Panel](#) | [Blog Post](#) - Fully-featured job matching platform with AI, dynamic filtering, resume parsing, and hiring workflows.

Vestora– [Live Site](#)- Developing interactive mobile gaming experiences with React Native, implementing real-time multiplayer features using WebSockets, building smooth animations, and optimizing app performance across devices.

FastKar – [Live Site](#) | [Demo](#) - Full-stack ride-booking app with map navigation, user auth, and real-time flow
